EDUCATION

Graphic Era University <i>B.Tech CSE (VI Sem, CGPA: 9.34)</i>	2023 – Present
Mount Litera Zee School <i>Intermediate (88.20%)</i>	2023
St. Mary's Secondary School <i>High School (98.67%)</i>	2021

INTERNSHIPS

DEAL, DRDO <i>IoT Security Intern</i>	June 2026 – Present
- Simulating a LoRaWAN based IoT network in NS-3 for lower power IoT applications. - Implementing and evaluating AES and ASCON cryptographic schemes, analyzing security performance tradeoffs using metrics such as execution time and latency.	
Personify (IIT Roorkee) <i>Data Science Intern</i>	Aug 2024 – Sept 2024
- Developed foundation of core concepts of ML and DL - Created a spam detection system using NLP techniques like BOW, TF-IDF and ML algorithms like Naive Bayes.	
Threat Prism (IIT Bhubaneswar) <i>Cyber Security & Ethical Hacking Intern</i>	Mar 2024 – Apr 2024
- Developed basic skills on Kali Linux for penetration testing using tools like Nmap and Wireshark. - Deployed a network and port scanner to detect live hosts and open ports.	

PROJECTS

ParseVisualizer-A visual syntax analyzer 🔄 📄	Jan 2026 – Jun 2026
- Developed a system to demonstrate lexical analysis, syntax analysis and parse tree generation for input expressions. - Built interactive visualization for parse trees to clearly represent syntax structure and identify errors.	
ShareNexus: Community-Based Resource Sharing Platform 🔄 📄	Jan 2026 – Jun 2026
- Developed a skill and resource sharing platform enabling users to collaborate, exchange knowledge and share resources efficiently. - Implemented secure authentication ensuring data protection, authorized resource sharing and safer user interaction.	
Machine Learning Based Phishing Attack Detection 🔄	Jan 2025 – Jun 2025
- A machine learning system capable of identifying phishing websites and emails. - Developed and evaluated multiple classifiers: Random Forest, XGBoost, Support Vector Machine (SVM), Logistic Regression and Naive Bayes along with deep learning models (CNN, BiLSTM) and combined the output of all these algorithms using ensemble learning.	
Sentiment Analysis using Wrapper and Filter-Based Algorithms 🔄	Jul 2024 – Dec 2024
- Developed a sentiment analysis system on X data using TF-IDF for feature extraction. - Implemented bio-inspired algorithms: PSO and GWO by applying both filter-based and wrapper-based approaches using LR.	

SKILLS

Languages: C, C++, Python, Java

Frontend: HTML, CSS, JavaScript

Database: MySQL, MongoDB

Tools: Excel

Version Control: Git, GitHub, GitLab

ACHIEVEMENTS

- . Ranked among the Top 75 coders in the HackOn with Amazon 6.0.
- . Secured First Rank in school in class X Board Examination.

RESEARCH WORK

- . Research paper on Machine Learning–Envisioned Mechanism for Phishing Attack Identification through URLs presented at the IEEE International Conference on Computer, Information and Telecommunication Systems (CITS) 2025, Colmar, France in July, 2025 published by IEEE at DOI: 10.1109/CITS65975.2025.11099199.
- . Research paper on Sentiment Analysis Using Wrapper and Filter Based Bio-Inspired Algorithms has been communicated to International Journal of Computational and Experimental Science and Engineering (IJCESEN).

HACKATHONS

- . Participated in Graph-e-thon organised by Graphic Era University collaborating in a team to develop solutions for real world problems.
- . Participated in SIH organised by Ministry of Education (MoE), Government of India collaborating in a team to develop an innovative solution to a real-world challenge..
- . Participated in HackOn With Amazon 6.0 organised by Amazon collaborating in a team to design innovative solutions.

WORKSHOPS

- . Participated in the National Workshop on Intellectual Property Rights organised by Uttaranchal University (March 2024).

CO-CURRICULAR ACTIVITIES

- . Competed at the district level in basketball, showcasing teamwork, discipline and leadership.

HOBBIES

- . Gardening
- . Cooking
